(30 min body, 30 min foot)

90 min - \$80

(Any Combination)

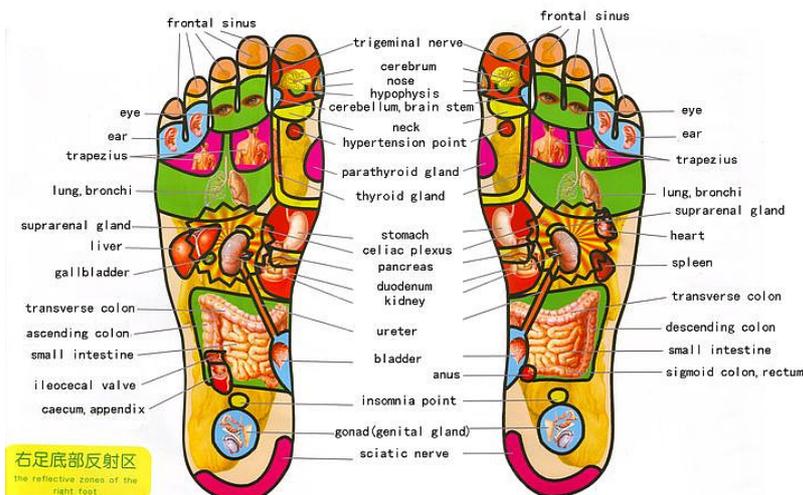

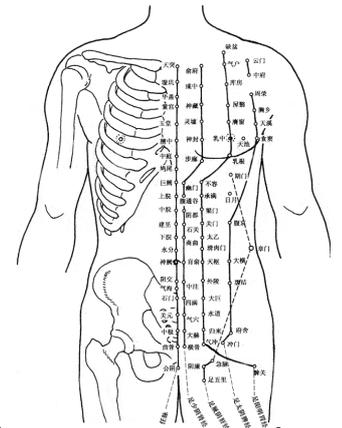

Acupressure had its beginnings 4,000 years ago in China. The Chinese observed that by touching particular points on the body, a certain effect would occur every time. These points used in acupuncture lie along channels called "meridians" which run through the body along specific lines.

Flowing through the meridians is energy our life force. The Chinese discovered that this energy must flow evenly through the meridians to maintain good health. They then matched symptoms and meridian system which the external elements around them (cold, wind, damp heart, and summer heart) and developed their system of medicine.

This ancient art originated in the Far East and has evolved over many centuries. It is now actively practiced around the world and is recognized as a highly effective and a natural way to relieve pain and simulate healing.

Acupressure focuses on the essence of energy flowing through our bodies and the amazing heart result achieved by stimulating pints along seemingly invisible meridian lines.

Research studies and practitioners from around the world have found acupressure to be effective at alleviating or improving a wide variety of health conditions, including: headache, stress, back pain, sins problems, toothache, facelift, appetite control sexual enjoyment, PMS and many more.

Reflexology: Our feet are microcosm – or maps – of our entire bodies. They contain thousands of tiny nerve called reflexes which correspond to every organ and system within the body. Simply putting pressure on these reflex points can create amazing results. Reflexology reduces stress, revitalizes, and balances energy and creates an overall sense of well-being.

Research studies from around the world have proved reflexology is profoundly effective in either curing or greatly alleviating health problems as Backache, Arthritis, Heart Disease, Depression, Digestive Problems, Headache, Insomnia, Menopausal Problems, Stress, Fatigue, PMS, Asthma, Common Children's Ailments, and many more.
